

SPIRITS

Spirits such as whiskey, cognac and brandy, grappa, vodka and all other distilled beverages are complex combinations of alcohol, ethers and hints and notes of flavour benefitting from the use of the wand.

Use the wand to tame the dominance of alcohol thus bringing the desired flavours and aromas to the foreground.

BACKGROUND

The decantation or aeration of spirits such as whiskey, cognac and other specially crafted distilled beverages is necessary for the full enjoyment, however it also has some unwanted effects over time. With the wand you can easily “decant” or “open” each individual glass in just minutes for full enjoyment rather than decanting the whole bottle.

WHAT IS THE WAND?

The wand features the revolutionary <33™ Technology that achieves full aeration effects of decanting in just minutes amongst other desired benefits.

WHAT DOES IT DO?

The wand oxygenates the distilled beverage which opens up the aromas and softens the taste of the alcohol. Decanting can have the same effects but requires considerably longer and can start oxidation degradation over time. Spirits often need to be decanted for at least a few hours to show the same effect, which requires planning and preparation and is not always practical, especially if you only enjoy a glass at a time.

HOW DOES IT WORK?

The wand is a solid crystal glass wand embedded with natural frequency patterns below 33 Hz (0.2-33 Hz). It encourages oxygen uptake and allowing the bouquet (smell) and taste to fully evolve while taming the taste of the alcohol.

HOW DO YOU USE IT?

1. Carefully place the wand in the glass.
2. Leave it for 3-5 minutes.
3. Remove and enjoy!

Cheers!

As noted by a well-known and established sommelier and master of wine:

“It not only improves the taste, aroma and experience of cognac and whiskey, the effect appears similar to additional aging of 5-10 years – quite incredible!”

WINE

The wand gives consumers a means of improving wine, including young red wines and aged red and white wines, primarily by opening up the aromas and softening the tannins.

The wand provides wine lovers with a notable improvement over regular decanting and even aging.

BACKGROUND

Modern red wine drinkers are showing a preference for wines with dark colors, full body, and rich ripe fruit flavors. This trend has forced winemakers to use techniques such as long macerations to extract more color and flavor from the grapes. But longer macerations also extract more tannin, and this can make wines taste more astringent, and therefore they need to mature for longer before being ready to drink.

In today's fast paced world, over 95% of wine is consumed within 24 hours of purchase. Consumers are not cellaring wines to the same extent as previous generations. Instead, young red wines are of-

ten being opened and consumed long before they are showing their best. Many of these red wines would benefit from decanting, but decanting requires time and preparation which is not always practical for wine consumers.

WHAT IS THE WAND?

The wand features the revolutionary 33^{TM} Technology that achieves full aeration effects of decanting in just minutes amongst other desired benefits.

WHAT DOES IT DO?

The wand oxygenates the wine which opens up the aromas and softens the tannins. Decanting can have the same effects but requires considerably longer and can start oxidation thus degrading the wine. Wines often need to be decanted for at least one hour or more to show the same effect, which requires planning and preparation and is not always practical.

HOW DOES IT WORK?

The wand is a solid crystal glass wand embedded with natural frequency patterns below 33 Hz (0.2-33 Hz). It encourages oxygen uptake and other beneficial frequencies allowing the bouquet (smell) and taste of the wine to fully evolve.

WHAT TYPE OF WINES SHOULD YOU USE IT ON?

The wand works best on **red wines that are young and tannic.**

It is particularly effective on some wines made from Cabernet Sauvignon, Merlot, Syrah and Nebbiolo. **Older wines, red and white** that have been cellared for some time also benefit from a speedy and efficient aeration to open the wine for best enjoyment.

HOW DO YOU USE IT?

1. Carefully place the wand in the wine bottle or the wine glass.
2. Leave it for 3-5 minutes.
3. Remove and enjoy!

Matching today's pace and expectation of immediate fulfillment.

The wand is not only highly functional, it is a beautiful piece of art which renews the ritual of preparing wine for complete enjoyment.

SAFETY INFORMATION (EN)

Please read and comply with all of the instructions and warnings provided in this manual and packaging before using the product. Failure to comply with the instructions and warnings provided herein **may result in serious injury**, inaccurate results and/or damage to the product itself.

- **DO NOT** use the OMNE-Wand if cracked or chipped. If cracked, chipped or damaged in any way, please safely dispose of the Glass Wand.
- **DO NOT** put into oven or microwave oven.
- **KEEP AWAY FROM REACH OF CHILDREN.**
- Wash with mild soap.
- **DO NOT** put into dishwasher.
- **DO NOT** dispose product in a fire.
- Only use for intended usage.

SICHERHEITS- INFORMATIONEN (DE)

Bitte lesen und befolgen Sie alle Anweisungen und Warnungen in diesem Handbuch und der Verpackung, bevor Sie das Produkt verwenden. Die Nichtbeachtung der hierin enthaltenen Anweisungen und Warnungen **kann zu schweren Verletzungen**, ungenauen Ergebnissen und/oder Schäden am Produkt selbst führen.

- Verwenden Sie den Glasstab **NICHT**, wenn er gesprungen oder abgebrochen ist. Wenn der Glas Stab Risse, Abplatzer oder Beschädigungen hat, entsorgen Sie den Glasstab bitte sofort und sicher.
- **NICHT** in den Ofen oder die Mikrowelle geben.
- **HALTEN SIE DEN GLAS STAB FERN VON KINDERN.**
- Mit milder Seife waschen.
- **NICHT** in die Spülmaschine geben.
- Produkt **NICHT** ins Feuer werfen.
- Nur für den bestimmungsgemäßen Gebrauch verwenden.

INFORMATION SUR LA SÉCURITÉ (FR)

Veillez lire et respecter toutes les instructions et tous les avertissements fournis dans ce manuel et dans l'emballage avant d'utiliser le produit. Le non-respect des instructions et des avertissements fournis dans le présent document **peut entraîner des blessures graves**, des résultats imprécis et/ou des dommages au produit lui-même.

- **NE PAS** utiliser le OMNE-Wand s'il est fissuré ou ébréché. En cas de fissure, de déchirement ou d'endommagement de quelque manière que ce soit, veuillez jeter le bâtonnet en verre en toute sécurité.
- **NE PAS** mettre au four ou au micro-ondes.
- **GARDER LOIN DE LA PORTÉE DES ENFANTS.**
- Laver avec du savon doux.
- **NE PAS** mettre au lave-vaisselle.
- **NE PAS** jeter le produit au feu.
- Utiliser uniquement pour l'usage prévu.

INFORMACIÓN DE SEGURIDAD (ES)

Lea y cumpla con todas las instrucciones y advertencias proporcionadas en este manual y en el paquete antes de usar el producto. El incumplimiento de las instrucciones y advertencias proporcionadas en este documento puede **provocar lesiones graves**, resultados inexactos y/o daños al producto en sí.

- **NO** use la varita de vidrio si está rajada o astillada. Si está agrietado, astillado o dañado de alguna manera, desechelo con seguridad la varita de vidrio.
- **NO** lo coloque en el horno ni en el microondas.
- **MANTENER LEJOS DEL ALCANCE DE LOS NIÑOS.**
- Lavar con jabón suave.
- **NO** poner en el lavavajillas.
- **NO** arroje el producto al fuego.
- Usar solo para el uso previsto.
